

RETRO

Simply playful play elements of the Retro product range are inspired by the design of playgrounds from years gone by. Their look, function and popularity are time-tested. However, they are purely contemporary and safe.

MATERIÁLY:

The bearing structures of the elements are made of steel pipes, most often \varnothing 25, 32, 42, 60, 72 mm. Straight or bent steel pipes are also used. The panel elements are made of 19 mm thick HDPE plastic sheets. The chains used are made of 6mm stainless steel wire. Rope elements and nets are made of ropes with multi-strand steel core braided with polypropylene or polyester yarn. The rope connections and rope terminations are made with couplings made of coloured plastic, aluminium and stainless steel. The slides of different lengths are made of AISI 304 stainless steel. The connecting material is stainless steel.

POVRCHOVÁ ÚPRAVA:

Handles, bars and balancing pipes and frames are coated with two layers of powder coating, with the first layer being a zinc base to protect the material, followed by a second decorative layer in a RAL shade. HDPE parts are uncoated. All materials used for the surface treatment meet both hygienic and ecological requirements.

KOTVENÍ:

Anchoring is solved by chemical anchors on prepared concrete footings.

BEZPEČNOST:

The play elements meet the safety and quality criteria defined by ČSN EN 1176 "Playgrounds".
